Vicon Announces Availability of IQeye 9 Series of Cameras

Hauppauge, New York (June 22, 2016): Vicon Industries, Inc. (VII: NYSE-MKT) ("Vicon"), trusted designer and producer of video security systems and high-performance IP cameras, is pleased to announce that the IQeye 9 series box camera will be available this summer and Vicon is accepting pre-orders.

The latest camera from Vicon provides wide scene coverage and highly accurate object detection with increased resolution and outstanding image quality. The new IQeye 9 Series also has increased processing power to effectively run analytics and VMS applications at the edge.

Powerful features: This modular camera offers true day/night capability and either a motorized varifocal lens or quick install or CS-mount versions for ultimate flexibility.

Increased processing power: With on-camera storage and true day/night capability, these cameras are available in H.264 with up to 5MP resolution, and provide high quality megapixel images. Our proprietary IQzip technology compresses bandwidth thereby allowing additional storage capacity.

Standards-based: Both ONVIF and PSIA compliant, the IQeye 9 Series works seamlessly with all leading NVRs and video management software (VMS) providers.

Clean design: Offering the option to remove or add front and rear caps to conceal the lens and cables plugged into the connectors for maximum design flexibility.

Embedded Vicon Analytics: The IQeye 9 series will feature in the next software release free, edge-based analytics that seamlessly integrates into ViconNet VMS and alerts are generated without the need of an analytics server.

"Vicon has utilized many of our latest technological developments to deliver a camera that produces outstanding images while utilizing low bandwidth demands by leveraging our new IQzip compression optimization. These cameras will improve productivity in security and enhanced accuracy in alarm detection with embedded video analytics," said Bret McGowan, Vicon Sr. VP Sales & Marketing.

For 48 years, Vicon has been an experienced designer and manufacturer of video management software, high-performance mega-pixel IP cameras, video storage solutions and access control systems. Vicon combines a complete security solution with a team-ecosystem of business and technology partners to bring the most comprehensive security solution in the market.
