

VAX Access Control Increases Features While Dropping Prices

Vicon's release of the latest version of VAX Access Control includes support for global anti-passback and a drastic reduction in hardware cost, making it extremely attractive in the starter and medium-sized systems market.

Continued improvements to the UI, added card formats, increased options for third-party integrations and an improved back end has established VAX access control as a premier product at a cost-effective price.

All VAX access control products are UL approved!

New Features & Functionality

Here are the new features available in version 2.7.

- **Global anti-passback (APB)** — A new memory module has been added to support this functionality. APB will have its own status report as well as customizable override functionality at the door level.
- **Auto add door functionality** — Adding doors to your system has never been easier. Now VAX offers the ability to add doors by selecting 'auto add doors,' creating the maximum number of doors supported by the panel type. This does not apply to elevator or I/O panels.
- **Improved card format configuration** — VAX has added two more card formats to an ever expanding compatibility range of cards. In addition to the increased range of compatibility, the configuration of card formats has now moved to site level with a simplified configuration interface, making installation and usability even easier.
- **Multi-vendor camera matrix** — VAX now allows the ability to view cameras from Exacq, Digital Watchdog and Milestone simultaneously. The user operations have been improved by being able to resize windows and offers the flexibility of choosing camera by camera or by associated device. Allows playback of live or historical video as well as the ability to use PTZ commands.
- **Interface improvements** — Support for duplicate credential, status tracking on card import screen and increase in custom field length. System Monitoring tab has added System Manager and SQL database.

PoE UPS Perfect for Remote Locations

Vicon offers a PoE UPS that is a perfect fit for any VAX access control deployment. The PoE unit is a plug-and-play device that is compact and robust. It directly connects to any PoE edge device and provides power for up to an hour.

This product is a great option in any remote location where a PoE switch may not be available or any mission critical doors that require emergency power for back-up.

Reduced Hardware Pricing Takes VAX to Another Level

In conjunction with user interface improvements, added features and integrations, Vicon has also lowered the cost of our advanced hardware to increase your ability to be competitive. Whether it's a starter package or an enterprise deployment, VAX Access Control now offers the right solution at the right price.

Model	Product Code	Description
VAX-1D-REX	10354-40	SINGLE DOOR CONTROLLER; integrated PIR/REX; supports back to back readers; black enclosure
VAX-1D	10354-50	SINGLE DOOR CONTROLLER; without integrated PIR/REX; supports back to back readers; black enclosure
VAX-2D-REX	10355-20	TWO DOOR CONTROLLER; integrated PIR/REX; for doors with only one reader; black enclosure
VAX-2D	10355-30	TWO DOOR CONTROLLER; without integrated PIR/REX; for doors with only one reader; black enclosure
VAX-2D-KIT	10355-53	TWO DOOR KIT; includes 1 two-door controller; mounted in steel vented and lockable enclosure
VAX-4D-KIT	10355-50	FOUR DOOR KIT; includes 2 two-door controller; mounted in steel vented and lockable enclosure
VAX-6D-KIT	10355-51	SIX DOOR KIT; includes 3 two-door controller; mounted in steel vented and lockable enclosure
VAX-8D-KIT	10355-52	EIGHT DOOR KIT; includes 4 two-door controller; mounted in steel vented and lockable enclosure
VAX-BK-BOX	10358-00	CONTROLLER BACKING PLATE; for mounting on concrete walls; metal construction with six conduit knockouts
VAX-WIFI-ABLY	10360-00	CONVERTS CONTROLLER TO WIRELESS NETWORK; via mini wireless access point, full router capabilities, PoE output power; includes 48 V transformer
VAX-ENCL-W	10354-05	OPTIONAL WHITE ENCLOSURE; for door controllers
