

Software House/ViconNet Access Control Solution

- Supplement your Access Control system with the ViconNet Video Forensics
- Video display in response to an access event
- ViconNet provides a true video surveillance system with capabilities such as: logical camera grouping, email or text alerts, flexible fps settings, web browser plug-in and the Virtual Matrix Controller
- Live and playback view on demand
- Fully scalable

Vicon® Industries Inc. and Software House® have joined forces to create a powerful, integrated Access Control and Video Surveillance system that combines the two technologies for a complete security solution. By adding ViconNet® 7.1 to an existing or planned Software House C•Cure 9000® Access Control system, all of the power of the ViconNet application is available from within the C•Cure 9000 application. ViconNet has been fully certified to work with Software House C•Cure 9000 through their "Connected" program.

ViconNet and C•Cure 9000 share the same network and all communication between the two systems takes place on the network. The integration module processes the event triggers from the C•Cure 9000 system, which are then utilized by ViconNet, to provide the video

stream. When an access control event or action occurs that has been defined as video related, video forensics are provided as well as the event log to present a complete record of what occurred and when it occurred.

In a typical installation, this will all take place within the C•Cure 9000 application. The user does not need to have the ViconNet application running or access it to play, record or search video. However, if the user wants to take advantage of all of the powerful functionality offered by ViconNet, the complete application can be run and accessed on a parallel system.

Requirements

Supporting O.S.:

Microsoft® Windows® 7, 32/64 bit; Windows Server 2003, 32 bit (service pack 2 or later); Windows Server 2008, 32/64 bit

Minimum PC:

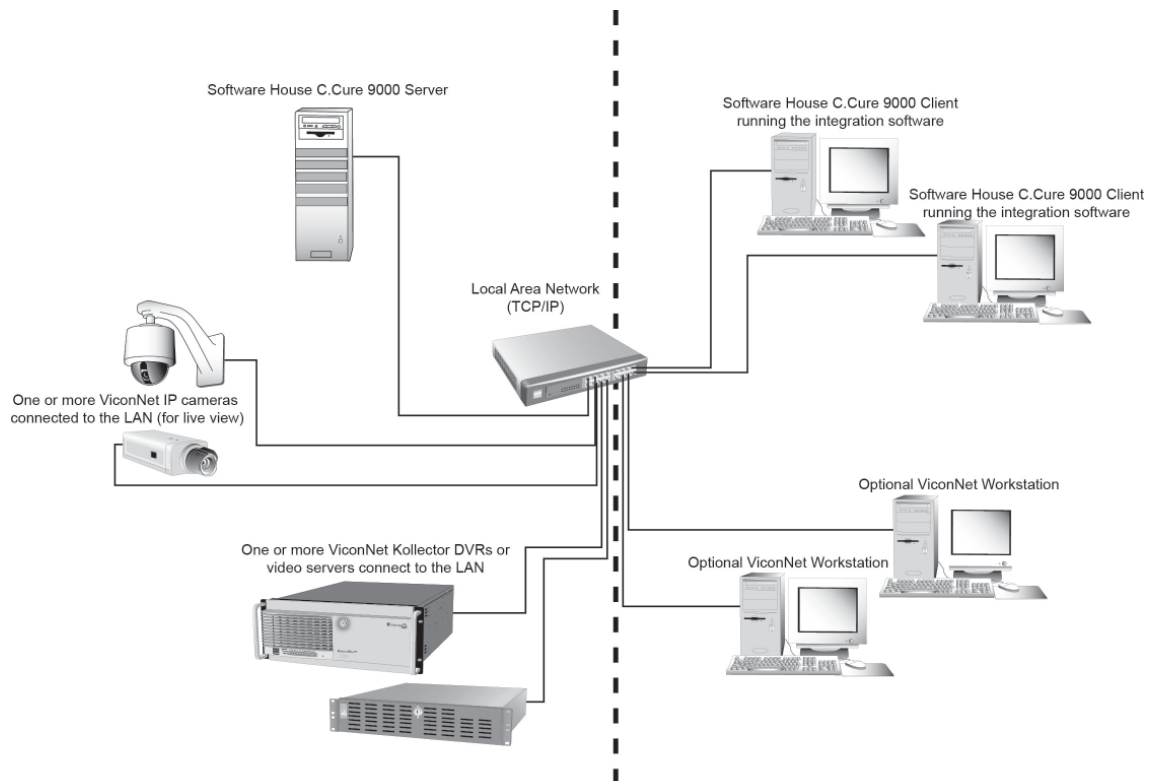

Intel® Core™ i5 processor; 2 - 4 GB RAM; strong display card with 256 MB RAM onboard; 5 GB of free space on hard drive; Microsoft. NET 4.0

Software and Licenses:

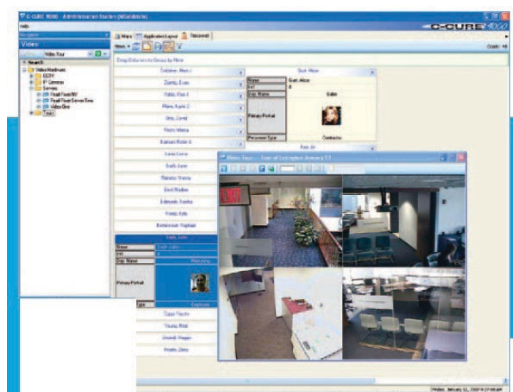

Vicon's VN-SWH-INTV7 software integration package
Software House license for C•Cure 9000 video support

The ViconNet system is completely integrated with the Software House system and provides the following functionality:

- Display live video from any cameras connected to the ViconNet system in any order
- Select which cameras from the ViconNet system to import into the Software House C•Cure 9000
- Play back recorded video with full playback control (play, stop, pause, rewind, fast forward, frame by frame)
- Display video from several areas
- Display video from a specific area
- Create a video snapshot
- Monitor video to follow up on alarm
- Create an archive on ViconNet
- Play back video for specific cameras
- Provide graphical map of the access control and camera location
- Allow the operator to call up video from the map

Typical Software House C•Cure 9000/ViconNet Network Setup
