

THE NEW **VALERUS** SECURITY CONSOLE

A modern and intuitive surveillance and business workstation for today's multi-tasker.

Vicon's new all-in-one security and operations workstation

Introducing THE NEW WAY TO WORK

This industry-first security and operations console offers an all-in-one ergonomic workstation with unmatched flexibility.

Designed with the demands of security monitoring in mind, this three-monitor high-powered console places the capabilities of Vicon's integrated security suite, featuring Valerus VMS and VAX Access Control, literally at your fingertips. With three 24-in. high-resolution touchscreen displays, it's a multi-functional work console that eliminates cluttered desks and improves operational efficiency.

Product Highlights

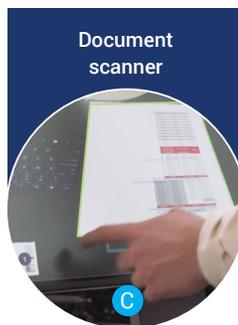

- Ergonomic pre-configured three-monitor workstation with i7 Windows PC
- Use as a central control station for a combined security console and business desk
- Simultaneous multi-monitor display of video, access control and non-security applications
- Easy-reach touchscreen monitors technology
- Motorized elevation of desktop allows easy adjustment for sitting or standing work positions

STYLISH YET POWERFUL

The integral i7 class PC is the engine behind this outstanding design. It enables each station to function as a full-time Valerus video monitoring and administration client, with no performance limitations, while simultaneously supporting the full on-screen display of Vicon's VAX desktop monitoring. Combined with the third monitor that can be dedicated to conventional business functions, the Valerus Security Console delivers that perfect balance of design and functionality.

Integrated operational tools including:

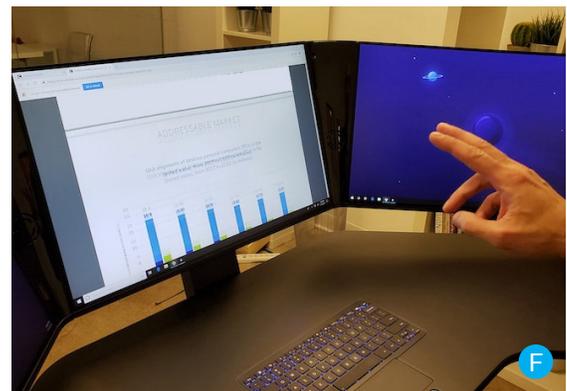

At first glance it's easy to see how much more attractive the Valerus Security Console is compared to a conventional cluttered desk. But a closer look reveals the real genius and difference this console delivers. Embedded into the framework is a set of unique operational capabilities designed to enhance your working experience.

Other built-in capabilities include a flush desktop wireless phone charger, a document scanner that automatically outputs PDF files and integration with your phone, including a wireless headset. However, as powerful as all these features are at reducing desktop clutter and optimizing a worker's focus, they are just the tip of where Vicon will take this new concept.

BUILT FOR THE FUTURE

Included now is the first step in software designed for virtual PC control and the eventual elimination of hardware like a mouse or keyboard. The incorporation of the first generation of "Touchless Gesture" software enables certain desktop controls, like page turns and web surfing, with the swipe of a hand.

Virtual hand-gesture sensor for on-screen control

PC Specifications

Model	Description
Operating System	Windows 10 Pro
Processor	8th generation Intel Core i7
Memory	32 GB (16x 2) DDR4
Storage	SSD 256 GB + 2 TB HDD
Graphics	GTX 1060 TI 6 GB
Ports	1 USB 3.1 type C; 2 USB 3.1 type A; 3.5 mm microphone in/stereo headphone out; RJ-45 Ethernet
Wireless	802.11AC Wi-Fi; Bluetooth 5.0
Sensors	Touchless gesture sensor monitor
Phone Charger	10 W fast charging Qi wireless power charging v1.2.3
Keyboard	Integrated chiclet-style keyboard and trackpad
Display	Three 24-in. 16:9 10-point touchscreen IPS display. Resolution: 1920x1080 @ 60 Hz; contrast ratio 1000:1.
Face Camera	5.0 MP 1080p @30 fps
Audio	Microphone: High-performance, stereo array with noise cancellation. Speakers: 2 stereo, front-facing.
Mechanical	
Dimensions	Sitting (minimum): 59.7 (W) x 33.7 (D) x 38.9 (H) in. (1516.4 x 856 x 988 mm). Standing (maximum): 59.7 (W) x 33.7 (D) x 64.4 (H) in. (1516.4 x 856 x 1635.8 mm).
Weight	119.21 lb (54 kg)
Color/Finish	Matte black
