

March 2019

Smart Manager Camera Discovery Tool

General Description

Vicon has released a new camera discovery utility for production for the cameras listed below.

Camera discovery utility for camera models:	Older Version	Newest Version
V80xD/V81xB series, V93xEZ, V93x, V-CELL-HD, V92x, SN663, SN673, SN680, SN693, SN660, CE20x, V97x, V95xx, V98x and the V901T encoder	v2.3.3.11	v2.3.3.15

Vicon Production

The latest firmware and discovery tool are available on Vicon's website. Manufacturing will switch over to the new utility for new production and update all existing inventory.

This is not a mandatory update. However, updating of the camera discovery utility is recommended to optimize interoperability with the cameras listed above with their most recent firmware. Please review the release notes to help determine if the fixes included are relevant to your environment.
