Introducing VALERUS VMS Version 20

The easiest VMS you'll ever use just got better!

Valerus is Vicon's next-generation Video Management System developed for the modern security and surveillance world. This new release of Valerus adds features designed to expand its overall capabilities while maintaining its core value as the easiest VMS on the market.

It delivers full situational awareness and exceptional image detail, leading to quicker response times, reduced investigation times and outstanding overall protection. The newest and most advanced version of Valerus adds features, improves performance and offers even greater ease-of-use.

Product at a Glance

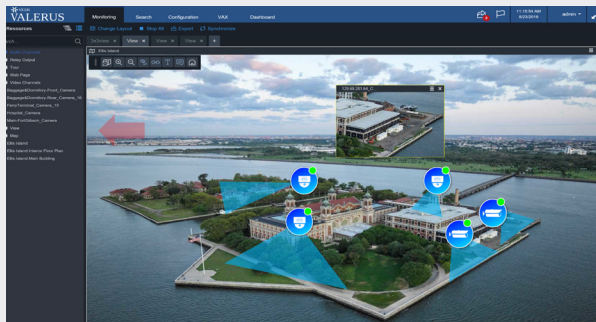

- Interactive Mapping
- Bookmarking
- Event Search
- Improved Cybersecurity
- User Interface Improvements

Here are the Key New Features

Interactive Mapping - *Provides precise view of camera location and surveillance layout, enabling you to respond to trouble more quickly*

Valerus offers the ability to download detailed maps and overlay camera and other resource icons directly on to it, to create a visual reference of your system.

- Creating, configuring and saving maps are simple and easy
- Load PNG or JPEG map images into Valerus from multiple sources
- Drag-and-drop actual cameras onto the map at their true locations
- Quickly link each map for easy navigation
- Add animated field-of-view representation to show where the camera is pointing

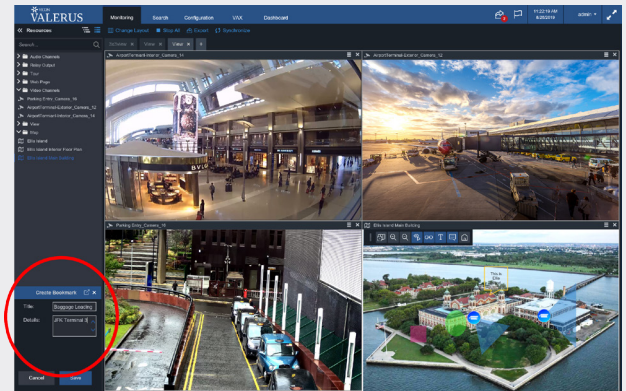

Valerus allows the user to integrate PNG or JPEG image files such as maps or blue prints; the maps created are listed in the Resources list along with the cameras and other resources. The maps provide a precise view of camera location and surveillance layout of your system.

The mapping functionality presents a wealth of information in a very efficient and understandable manner and is extremely useful for local law enforcement and security teams.

Bookmarking - *Tag video for future reference*

Valerus provides the ability to create a bookmark related to a specific video feed. This allows the user to flag video sequences of particular interest and add descriptive notes, so information can be easily shared.

- Quickly tag a point of interest on the video stream and create a name and remarks for it as needed
- See a visual reference to quickly return to the event when necessary
- Special notes and references are easily attached to each bookmark that can be shared with colleagues
- Easily find bookmarks via the new "Event Search" interface

Bookmarking helps you keep track of noteworthy events while users are building a case or trying to gain a better understanding of concerning incidents.

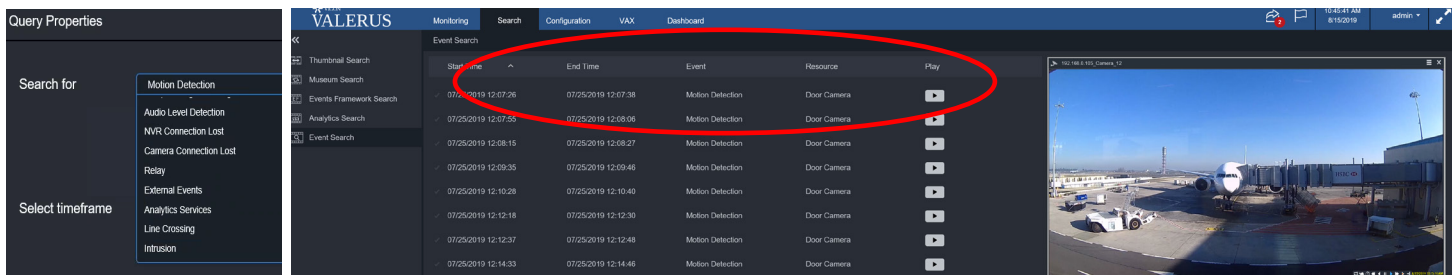

Event Search - *Easily navigate to required event type*

The Event Search feature enhances the way users interact with systems, dramatically improving event response times and helping make event issues more actionable.

An events database provides the ability to store all events that occur in Valerus, including both internal and external events, allowing the user to look back historically. User can perform searches for events such as motion detection, tampered images, NVR connection lost, camera connection lost, external events or analytics services.

- Event Search interface provides a fast search for past events by type
- Search for recorded events by a specific camera, multiple cameras or all cameras
- Play and export important clips right from the search results
- Intuitive user interface requires no special training

Search results can be sorted by time, event or resource

Additional New Features include:

- Improved Cybersecurity with forced complex passwords
- User Interface improvements for easier control and reaction to important events

Valerus VMS Tier Comparison Chart

Simple and Cost-Effective Licensing Tier Options to Meet Your Specific Needs

	CORE	PRO	ENTERPRISE
GENERAL OPERATIONAL PARAMETERS			
Maximum number of devices per system	35	Unlimited	Unlimited
Maximum number of simultaneous clients	10	Unlimited	Unlimited
Maximum number of supported devices	35	Unlimited	Unlimited

Take Advantage of These Amazing Offers

See for yourself why Valerus is considered the easiest VMS you'll ever use.

We've loaded Valerus with powerful features like **interactive mapping**, **bookmarking**, and **historical event search** so you can react quicker, monitor more efficiently and perform more thorough forensic investigations.

Free Valerus Starter Software

For anyone who doesn't already use a VMS

Experience the simplicity of Valerus through a **FREE Valerus CORE system** that includes 35 device connections.

Includes 35 Vicon device connections (non-Vicon device connections can be purchased at 50% off normal discounted price).

Limit: One CORE system license per registered end user. Each free license requires proper end user registration information prior to activation. The maximum combination of camera connections per system license (free and purchased) is 35. Offer includes software and activation license only, cameras, servers and other hardware sold separately. Software must be registered and activated by 3/30/20.

Free Replacement for Existing Software

For anyone who uses a competing VMS

Swap your old competing VMS for Valerus and receive a free **Valerus ENTERPRISE** license with an unlimited device connections.

Includes the active number of existing cameras connected to the competitive VMS being replaced.

Limit: One ENTERPRISE license per registered end user. Total number of free connections included in the license requires verification via a screen capture of competitive system configuration. Any add-on device connections necessary in future must be purchased. Software must be registered and activated by 3/30/20.

All above offers are valid to authorized Vicon resellers only. Vicon reserves the right to deny above offers without necessary registration information. Device connections are via ONVIF or RTSP protocols only. Special functionality may not be supported.

Click [here](#) or call Vicon now to sign up to take advantage of the new Valerus version 20 and these great free offers!
