

Welcome to Vicon's Webinar on  
**Next Generation  
VAX Access Control**

**PRESENTED BY**  
HUY Q LAI, APPLICATIONS ENGINEER

## Vicon Company Highlights

**Vicon delivers innovative products at every layer of the security solutions stack.**

### A Single-Source Supplier

Simplify your IT and security system with an end-to-end solution.

### User Friendly Design

Spend less time troubleshooting and setting up overly complex systems.

### World Class Support

Our engineers are dedicated to resolving even your toughest challenges.

From our advanced Video Management Software to our diverse product line of network and analog cameras and our flexible VAX Access Control solution, we deliver superior image quality and maximum coverage to match all of your security solutions. When these products are combined, they work seamlessly together to provide an end-to-end solution for your security needs. We offer a variety of options that let you customize your own powerful, scalable and cost-effective surveillance solution.

# VAX Access Control System Overview

Order VAX software pre-installed on a Vicon certified server or install it on a standalone PC.

(Available in white)

Choose from a variety of controller options for doors, I/Os and elevators, including the NEW Master Multi-Door Controller for up to 8 doors.

User-friendly navigation allows you to manage and effectively report and act on critical security events.

VAX supports leading card/reader systems, including mobile credentials technology and high-security smartcard readers.

User-friendly, browser-based interface with responsive web design.

# Webinar Agenda

System & Component Overview  
VAX Software Overview

VAX 2.9.92 Demo Featuring:

- Notification Settings
- Web Push
- Data Migrator
- Action Engine
- VAX Mobile

# VAX Version 2.9.92: Notification Settings

The **Notification Settings** section replaces the former Administrator Settings which had Alert / Email / Live Camera settings.

Allows you to create, modify, and remove notifications (e.g., door opened) that appear in the **Notifications Sidebar**.

Notifications run through a series of global and administrator rules that determine whether the notification is saved, shown in realtime, and/or sent via Email or Web Push.

Notification Styles allow you to customize how specific notifications appear in the **Notifications Sidebar**. You can choose specific background color, image shown, and sound played when notification is shown.

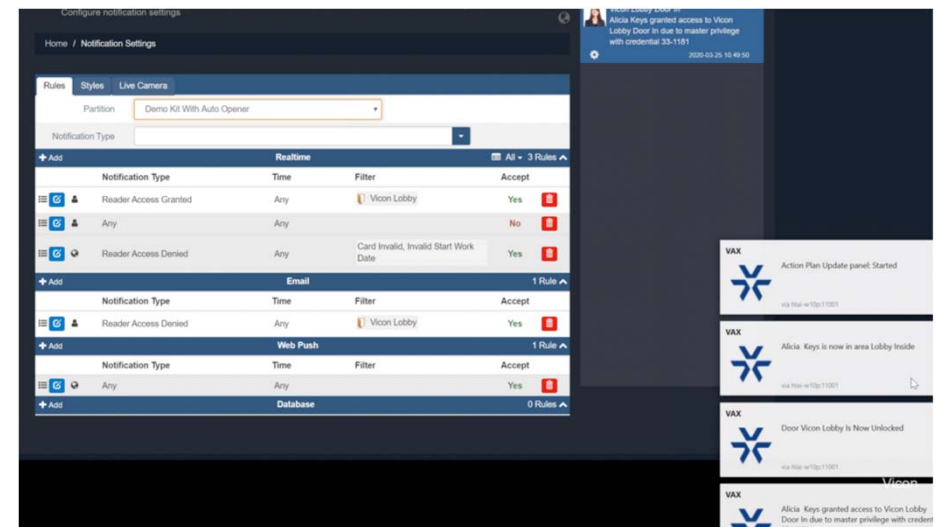

Live Camera rule allows you to display an associated camera when a **specific notification** appears.

Realtime notifications rules can be placed in Groups, which can be **selected on the Main Screen** or Monitoring menu to filter notifications using only the rules in the group.

# VAX Version 2.9.92: Web Push

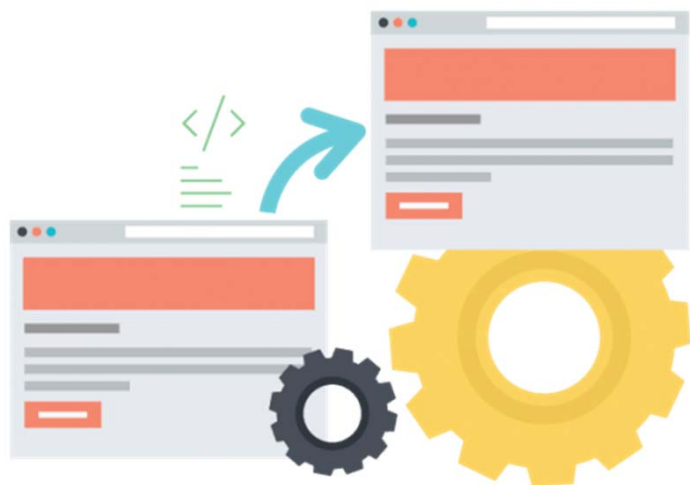

- **Web Push** allows VAX notifications to be pushed to your device using your web browser.
- Notification Rules specify which web notifications an Administrator is sent.
- Alert style messages slide in at the top or bottom right hand corner of your desktop screen even when your browser is minimized.
- **Web Push** is a service that is supported by Chrome, Safari, and Firefox browsers and requires VAX server be connected to the internet.

Subscription-based Push Notifications

# VAX Version 2.9.92: Data Migrator

- In current VAX software, you cannot move devices like panels and site from one partition to another.
- **Data Migrator** enables export and import of data between partitions and systems.
- All or specific data like Users, Crisis Levels, Access Groups, Devices and Scheduling, Cameras, and Action Plans can be exported from one or multiple partitions.
- From an export file, you can import all or multiple data from one or more partitions to an existing or new partition.

# VAX Version 2.9.92: Action Plans

ACE-A high performance engine allows simultaneous action executions and scalability limited only by the hardware it's running on. This intuitive, easy to use action plan editor allows you to create complex action plans in minutes. Mix and match over 40 customizable actions to create complex branching action plans to meet your business needs.

## **New Actions**

- Set Door Time Zone
- Set Floor Time Zone
- Enable/Disable Trigger
- Get Areas, Doors, Date, Users, Users in Area, Users not in Access Group
- Purge Notifications
- Run Action Plan

## **New Triggers**

- Door Overridden
- Door Resumed
- Door Crisis Level
- Door Prevented from Unlocking
- Door Time Zone Changed
- Panel Updated
- User Area Changed

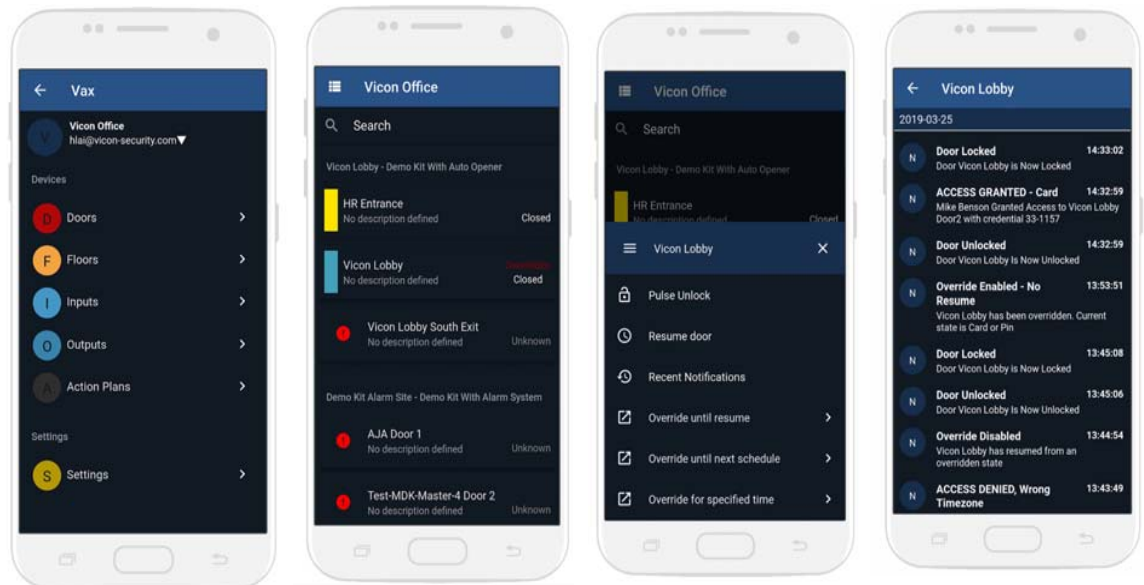

# VAX Version 2.9.92: Mobile App

- VAX Mobile App for Android and iOS
- Save and choose multiple VAX sites
- Choose and Override doors, elevator floors, inputs, and outputs
- View recent Door notifications
- Run Action Plans

We'd Love to Hear from You
