SALES ALERT

Introducing our Cruiser SN673V-C

We're proud to announce our latest camera, the Cruiser SN673V-C PTZ camera. This camera is a direct replacement of our popular Cruiser SN673V-B.

The Cruiser series has been a staple in our camera line for years, known for its unparalleled reliability, extreme durability and exceptional performance. This upgraded camera leverages the same reliable, vandal-proof form factor—allowing you to use the existing mounting options—while upgrading the hardware for today's security demands. The new series is currently shipping and the SN673V-B series is now end of life.

The SN673V-C boasts several upgrades to improve your surveillance operation. Unlike it's predecessor, this powerful PTZ camera features **H.265 smart encoding** to intelligently compress video streams to reduce storage and bandwidth costs. The camera now supports **quad streaming** and features our **standard analytics** package, making this camera a more intelligent option in every sense of the word.

Like its predecessor, the SN673V-C still excels in the most demanding surveillance applications. With **20x optical zoom** and motorized PTZ functionality, these cameras are ideal for covering large areas while delivering exceptional zoom quality and detail. The **autoiris lens** combined with **true WDR** maintains unprecedented video quality, day or night—even in high contrast or other tough lighting scenarios. Also like its predecessor, the SN673V-C is highly rated for weather and impact, so you can rely on the camera even in the most demanding environments.
