

The Future of Surveillance:

How to Configure and Leverage the New Features of Vicon's Valerus 21.1

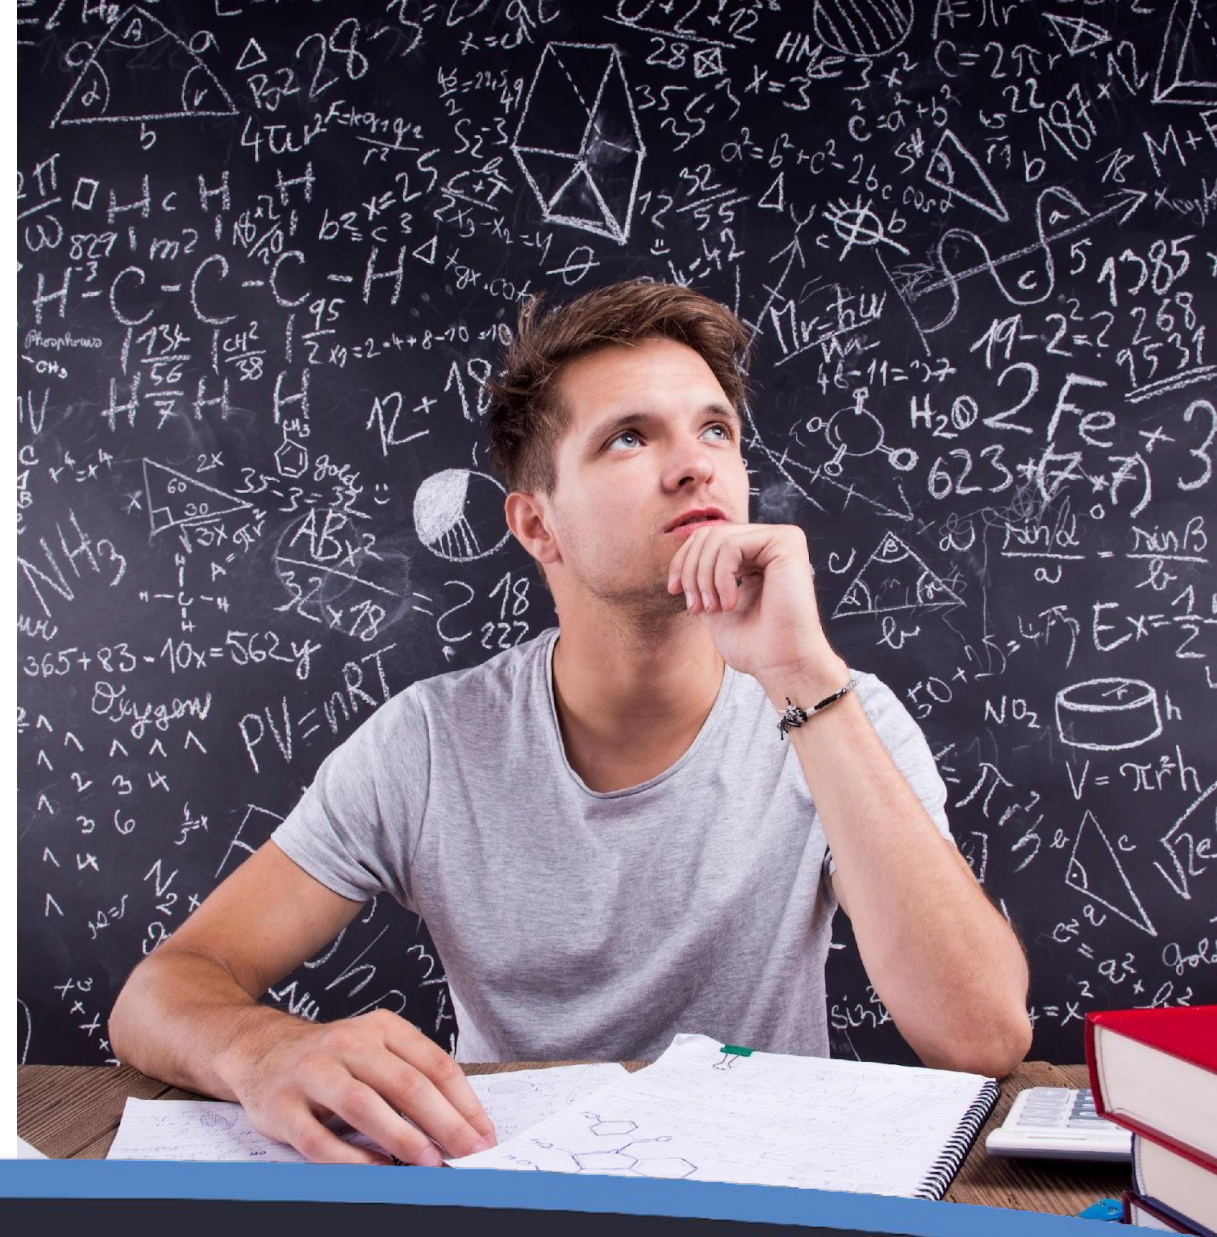

Part 2 of 2

October 2021

Agenda

- New Features Review
- Integration Frameworks
- Access List
- Dashboard Enhancements
- Snapshot Tool
- Cost Advantages
- Q&A

New Features in Valerus 21.1

- ✓ • Advanced Alarms Management
- ✓ • Client Performance Indicator
- ✓ • Integration Frameworks
- ✓ • Cybersecurity – Access List
- ✓ • Health Dashboard Enhancements
- ✓ • Snapshot Tool

New Features in Valerus 21.1

- Integration Frameworks
 - What is it?
 - Why is it important?
 - Is it the same as an SDK?

Integration Frameworks

- A powerful tool that allows integration with partner systems, including Access Control and License Plate Recognition
- A Framework was created to integrate Access Control Systems with Valerus
- A Framework was created to integrate LPR Systems with Valerus
- Allows adding and correlating the partner system data with the appropriate video channels
- Supports adding icons on Valerus maps to mark the partner resources
- Defines alarms and rules based on events provided via the 3rd party system

New Features in Valerus 21.1

- Cybersecurity Enhancements
- Access List

Access List

- If you wish to restrict access to specific Client PC's – you can create an Access List
- You can restrict access by:
 - IP address
 - MAC address
 - Valerus ID (found under Settings>About>Valerus ID)
- Once you implement the list, you must add all Client PC's that require access
- NOTE: This will **not** block the built-In ADMIN account from any PC regardless of the Access List

New Features in Valerus 21.1

- **Enhanced Health Dashboard**
 - View statistical and diagnostic information to assess system health
 - Detect potential system issues to ensure uninterrupted operations
 - Increase system protection through improved cyber security
 - Many new tools, alerts and visualizations

New Features in Valerus 21.1

- Snapshot Tool
 - Quick and easy method to update to all your reference images

Cost Advantages

- Access List
 - Increased Level of cybersecurity
 - Prevent any kind of data breach using Valerus as an entry point
- Enhanced Dashboard
 - Potential revenue stream for Integrator
 - Proactive Monitoring / Preventative Maintenance
 - Know who is accessing what and when
 - Determine if your system is being used or is performing as intended
- Snapshot Tool
 - Quickly determine if camera position issues are occurring

Cost Advantages

- Integration Frameworks
 - Our investment into your future
 - When you need to integrate with a 3rd party system
- All included in v21.1 upgrade with UPP

Summary
