

August 2023

Updated Version 2.20.0.0 of the PRONTO Device Manager Utility

General Description

Vicon is releasing an updated version of PRONTO Device Manager discovery tool, version 2.20.0.0. This application discovers, manages and updates Vicon cameras from a single interface, eliminating the need for multiple discovery tools.

Installing PRONTO does not require any licensing. This updated software is available on Vicon's [website](#).

Product	Previous version	New version
PRONTO Device Manager Utility	Version 2.19.0.0	Version 2.20.0.0

Vicon Production

Pronto Device Manager and User Guide can be downloaded from Vicon's website:

<https://www.vicon-security.com/software-downloads-library/pronto-device-manager-software/>

New Feature

IP Search

The Pronto Tool now supports camera discovery in different subnets. This is particularly useful when your cameras are spread out across different IP address ranges and subnets.

Firmware Library

For your convenience, this PRONTO Tool update is available in two versions. The full version includes an updated full Firmware Library for the current Vicon camera lineup (1.80 GB).

A second version is available without the Firmware Library (5.75 MB), for those users who want to discover cameras individually and don't need the full library or are on a low bandwidth connection and don't have the capability of downloading the larger file; these users can download camera firmware as needed from the Vicon website.
