## Vicon Introduces a New Series of HD Surveillance Monitors

**Edgewood, NY: (July 8, 2014)** - Vicon Industries Inc. (VII:NYSE-MKT) (“Vicon”), a leading security solutions provider and producer, introduces a new series of HD surveillance monitors that replaces all previous models. The new line of monitors offers cost effective, enhanced LED technology backed up by a 3 year warranty. The ability to endure 24/7 usage, along with superior HD performance displaying highly detailed images, make them a necessary component for any security installation. These new monitors will be available by the end of July 2014

The new line of monitors offers a breadth of sizing options including 18.5, 21.5, 23, 24, 32, and 42-inch, and use 40% less power due to LED backlighting. The 18.5, 21.5 and 23-inch models offer the ability to be rack mounted and all models, except for the 18.5 inch, display 1080p resolution. Picture-in-picture (PIP) and picture-by-picture (PBP) display capabilities are offered in the 24, 32, and 42-inch models. The entire range of models offers all the latest ease of use requirements such as convenient front panel controls, multiple inputs, a variety of mounting options, and built-in speakers.

“We have completely overhauled our monitor offerings after listening to our customers’ needs. This new line up is not only cost effective but also offers superior HD clarity and performance. And with enhanced 3 year coverage, this expansive line-up of monitors provides a reliable display solution for all security installations” says Bret McGowan, Sr. VP Sales & Marketing at Vicon Industries.
