## **V1400X-MSS Software Compatibility**

The V1400X-MSS Multisystem Selector allows one keypad to control up to eight remote matrix CPUs. The CPUs to be controlled must be capable of programming the keypad profiles to show an online state of "Always On".

The software version with this capability varies between CPU models. The following chart lists the version required for Multisystem operation. The version must be equal to or later than those listed below.

CPU software required:

VPS328.....	Ver 0.0.3
V1422.....	Ver 0.1.0
V1466.....	Ver 0.1.0
V1344.....	Ver 2.7
VPS1300.....	Ver 2.8

Keypad software required:

V1300X-DVC/RVC.....	Ver 3.0
V1400X-DVC.....	Ver 1.0

The V1411X-DVC Variable Speed Keypad is not compatible with the Multisystem Selector System.
